Announcement of the Results of FY 2021 Survey on Technical Intern Training Program

- After returning to their home countries, 89.0% of the technical intern trainees answered that what they learned during the technical intern training period was useful -

The Organization for Technical Intern Training has conducted the survey below and summarized the results.

Based on the results of this survey, the Organization for Technical Intern Training will continue to ensure appropriate and smooth operation of the technical intern training program and to deepen the understanding of the program to the people concerned.

1. Technical Intern Trainees Follow-up Survey after Returning Home Countries
(questionnaire for technical intern trainees)

This survey studies the post-training employment status, change of job grade and utilization of technology, skills and knowledge acquired in Japan for the technical intern trainees who completed the technical intern training program and returned to their home countries.

Survey subject of FY2021, technical intern trainees who completed the technical intern training who returned (*or were scheduled to return) to their home countries within the period of September 1, 2021 to December 31, 2021, were 27,046 (nationalities (birthplace) are China, Vietnam, Indonesia, Philippines and Thailand). Among of them are 7,930 respondents and 4,554 of which have a valid response that they have not yet returned to their home countries.

* Including former technical intern trainees who were scheduled to return but have not yet returned to their home countries due to COVID, and are residing in Japan with the status of residence as "designated activities".

2. Survey on Assistance to Technical Intern Trainees after Returning Home Countries
(questionnaire for supervising organizations, etc.)

This survey studies the employment status of the technical intern trainees who returned to their home countries in FY2020, job/skill transfer support and acquisitions of skills, etc. during the technical intern training for supervising organizations and implementing organizations of individual enterprise-type training (hereinafter referred to as "supervising organizations", etc.). Out of 3,175 supervising organizations, 2,945

responded.
